

Senior Software & IT Consultant

What you'll do

As a Senior Software and IT Consultant with Allegro Associates, you'll be part of an experienced team that thrives on solving complex IT and software challenges for our clients. Our small but agile team values expertise, autonomy, and direct collaboration with clients. You'll have the opportunity to make a positive impact by building new software, improving or fixing existing applications and IT systems, and advising on software architecture and IT strategy.

- **Develop new software:** Build line-of-business web applications from scratch or enhance existing systems to meet evolving business needs
- **Maintain and improve existing software:** Fix bugs, implement new features, and ensure platforms remain secure and up to date
- **Collaborate with clients and teammates:** Gather requirements, troubleshoot issues, and provide expert assistance
- **Advise on IT strategy and software architecture:** Help shape the technology direction for our clients by providing strategic insights

Our team primarily works remotely but meets weekly in-person. **We are currently unable to consider remote-only candidates.**

Qualifications

We value strong relationships with our clients and our ability to offer trusted, high quality technical solutions and advice. We are looking for a candidate with:

- 8+ years of experience with full-stack web software development, including the following:
 - o Either .NET (C#) or Java
 - o Front-end JavaScript/TypeScript frameworks (Angular or React preferred), HTML, CSS
 - o Relational databases (SQL server preferred)
- Strong fundamental understanding of software and computing (Undergraduate or graduate level degree in Computer Science or Computer Engineering strongly preferred)
- Experience with DevOps and CI/CD and associated tooling (Azure DevOps or GitHub Actions preferred)
- A strong grasp of IT infrastructure, including Windows, Linux, email systems, networking
- A versatile problem-solver with a proactive approach to learning new skills and technologies
- Strong independent work ethic. Since our team is small, self-management of tasks and the ability to spot work opportunities is critical
- Excellent written and verbal communication skills. We're looking for the ability to take the lead in client meetings, gathering requirements and demonstrating application functionality
- Experience with cloud platforms (AWS or Azure preferred) is a plus
- Experience with HCL Notes/Domino and/or nonrelational databases is a plus

What We Offer

- A culture of autonomy with minimal red-tape and management overhead
- Competitive salary and health benefits
- Flexible work hours
- A remote-first work experience, with a once-a-week in-person team meeting
- Paid time off
- Potential equity/partnership opportunities
